AI to AI: Artificial (machine) Intelligence to Augmented (human) Intelligence with Study Buddy | AI Assistant, advAlsa/kAloska and hAI! Friend. Co-create innovative smart solutions, for citizen services, education, and mental wellness.

AI is the future. Start using AI. Or AI is going to use you as.....batteries!

Our Animated Avatar-from-a-photo Conversational Multilingual AI will help people to start using AI

An AI-powered avatar that remembers you
— your voice, your world, your dreams. A
true companion at arm's reach, always
there, wherever life takes you.

Personalized AI for all from a single photograph... starting

with their own **kawAii** avatar

Problem - Solution

- In today's digital world, existing platforms fail to deliver on three critical fronts: **personalization**, **accessibility**, and **emotional connection**.
- Language barriers, educational disparities, and mounting mental wellness issues create friction that limits both adoption and long-term user retention.

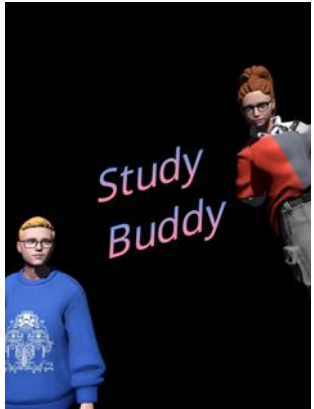

Our Solution: **A personalized AI avatar that remembers you**—your voice, your face, your context, your dreams.

From a single photo, this avatar becomes a lifelong companion—multilingual, emotionally intelligent, and deeply contextual. It grows with the user, integrating across services and touchpoints to deliver hyper-personalized support and care.

Solution

- Our AI to AI platform bridges technology and human needs through:
- Study Buddy: AI-driven learning.
- hAI! Friend: AI companionship.
- advAlsa/kAloska: AI kiosks for citizen services and tourism.

Market and Competition

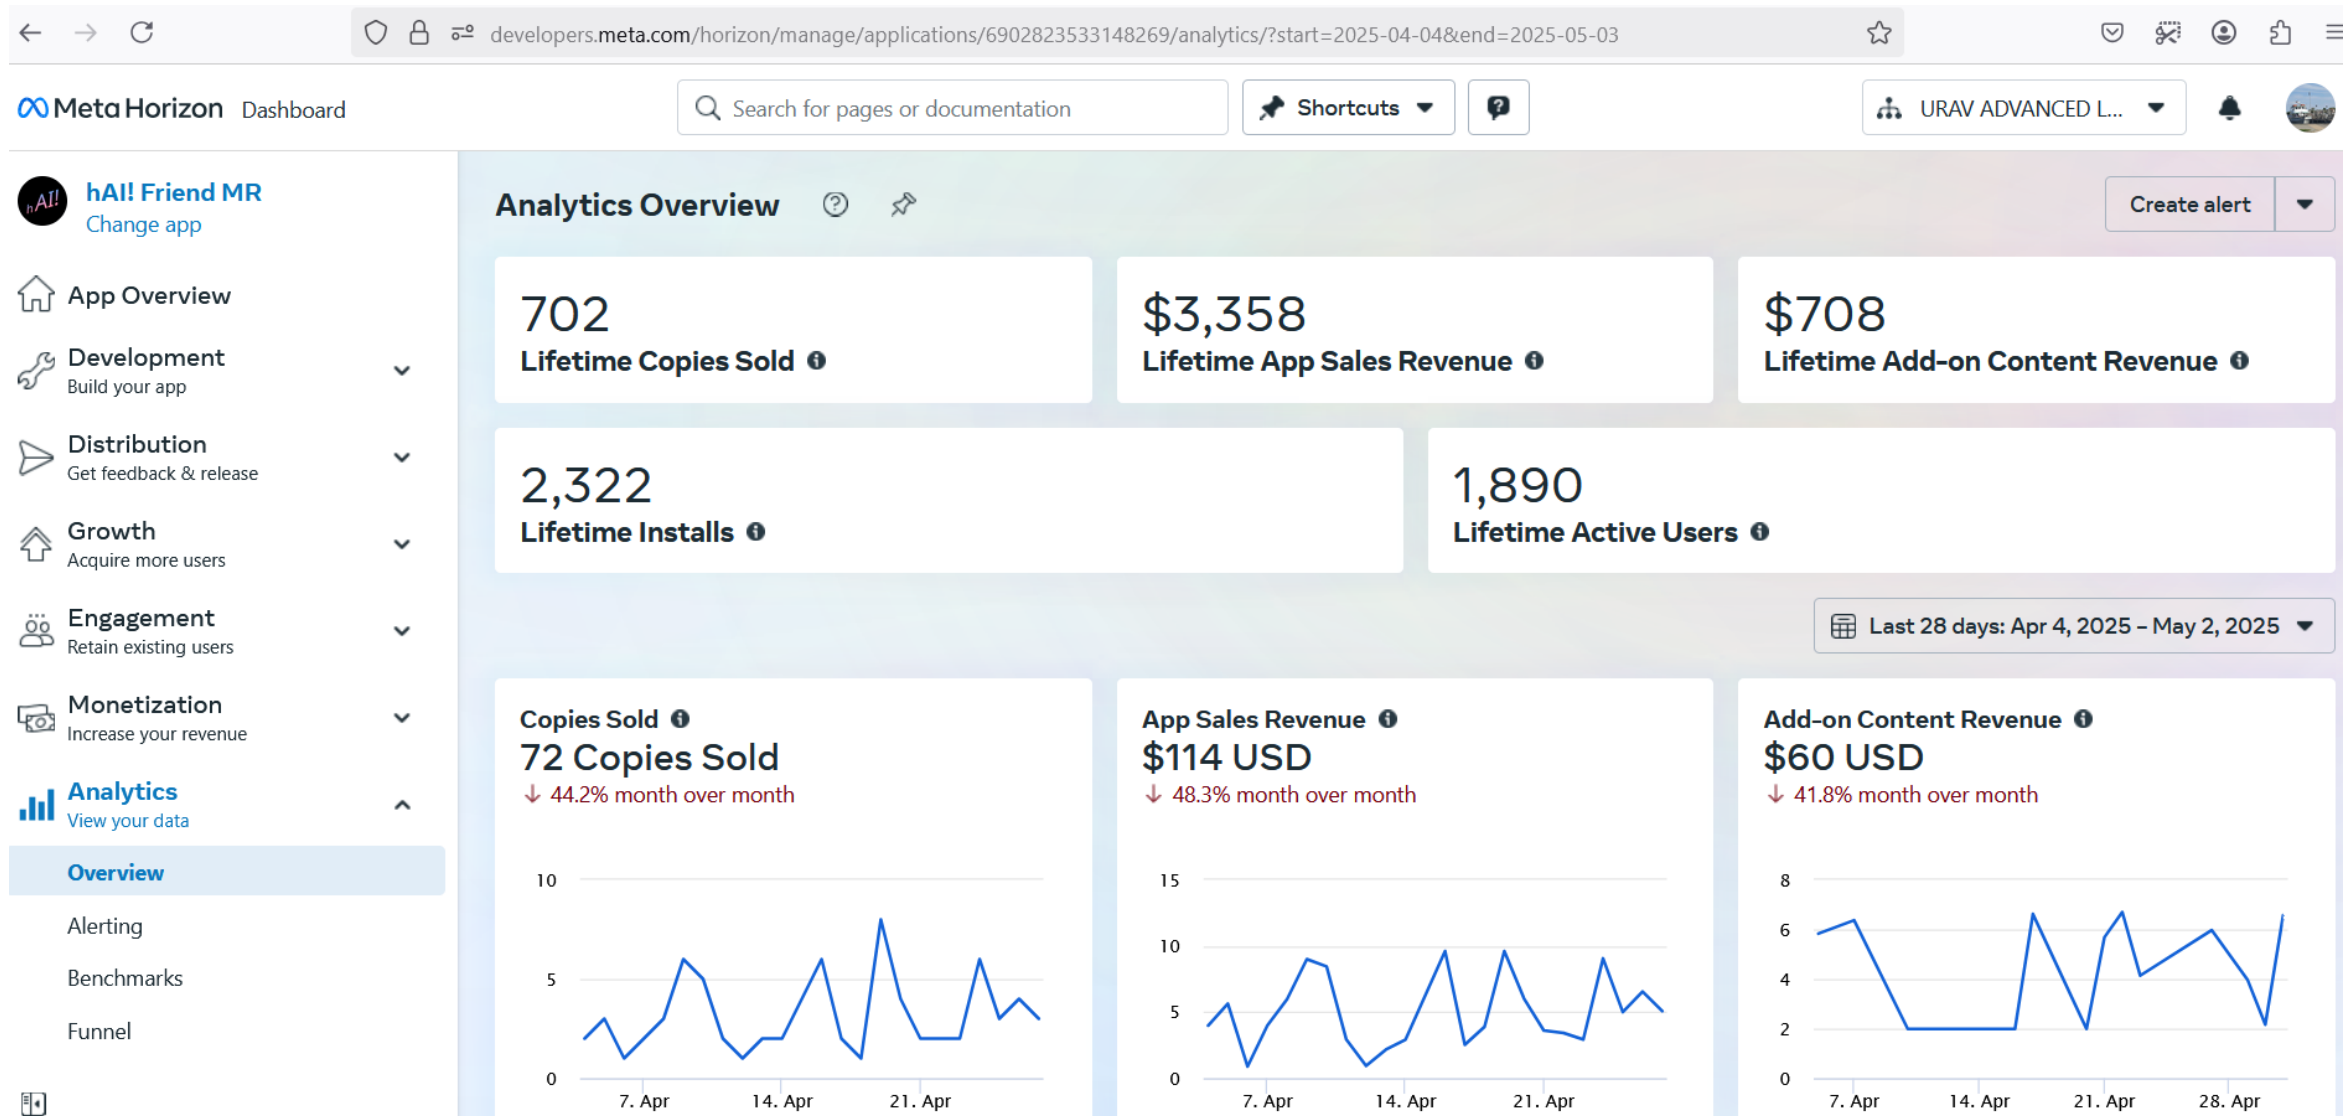

- With increasing urbanization and cosmopolitanism the need for multilingual AI-powered citizen services, education, and mental wellness solutions has never been greater.
- Smart cities globally are a \$2.57 trillion market by 2025. Japan, a leader in urban tech, spends billions annually on smart city development, education technology, and healthcare innovation.
- Indirect competitors like NTT Data, ElliQ, and Care.coach address parts of this problem, but no integrated AI solution spans education, citizen services, and mental health like ours.

Traction - hAI! Friend MR

Collaboration

- We seek a strategic collaboration to co-develop AI-powered solutions. This includes integrating generative AI for smart city and healthcare applications, joint development of citizen service kiosks, and OEM customization opportunities.
- **Proposed Collaboration Outcomes:**
 1. **AI Integration:** Enhance smart city initiatives with our AI platform.
 2. **Pilot Projects:** Deploy AI kiosks in transportation hubs and urban centers.
 3. **Co-Creation:** Develop innovative, scalable AI applications for global markets.
- Together, we aim to redefine smart city living with AI-driven accessibility, education, and wellness solutions.

Ravikumar - National Award for Commercializable Patent (TIFAC - Tremap) 10 Feb 2012

STPI in collaboration with Atal Innovation Mission (AIM), NITI Aayog have started Atal Incubation Centre in Bengaluru for innovative start-ups working in specific domains. AIC STPI Bengaluru is Centre of Entrepreneurship (Incubator) that work to support, promote and grow culture of innovation leading to start-ups & successful entrepreneurs.
